

**Harlequin AeroDeck** is an ultra lightweight water-resistant, modular sprung floor panel system manufactured from engineered panels with elastomer blocks, located at regular intervals on the underside, provide added shock absorption. The panels are laid in a brickwork fashion onto the subfloor, so that cross-joins do not coincide. They are linked to each other by a radiussed tongue and groove pivot joint and secured by a unique locking system, which remove the need to fix the panels mechanically to the sub-floor.

**Harlequin AeroDeck** is quick and simple to install. The portable panels have flexibility for reconfiguration and are light to carry due to an advanced internal structure inspired by aerospace technology. The core construction of the panel is unaffected by moisture therefore the system is suitable for use in outdoor productions.

**Harlequin AeroDeck** is finished by choosing an appropriate Harlequin vinyl performance floor surface.

## Specification Guide

<b>Permanent or Portable</b>	Portable
<b>Finish</b>	Harlequin Vinyl Performance Surface
<b>Full Size Panel</b>	96" x 48"
<b>Half Size Panel</b>	48" x 48"
