

Harlequin Cascade™

Now with BioCote® Antimicrobial Protection

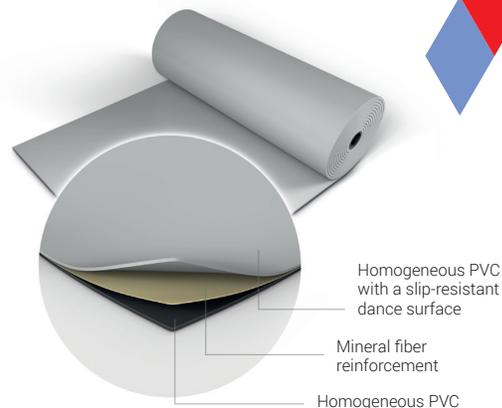

Harlequin Cascade™ still delights generations of professional dancers, artistic directors and technical and stage managers as the ultimate heavy-duty dance floor. The silky smooth embossed surface that's often described as giving 'warmth' to a performance, also provides deceptively good grip, as well as a high-quality base for lighting designers.

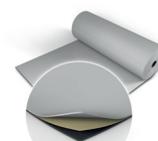

Harlequin Cascade now comes with **BioCote® Antimicrobial Protection**, an added ingredient that helps keep the floor hygienically clean by working constantly to reduce the presence of microbes on the floor surface that can cause odors and staining. Read more about BioCote® on reverse.

Harlequin Cascade is ideal for ballet, contemporary, modern and theatrical use, as well as aerobics, zumba, hip-hop, jazz, street, salsa, percussive including flamenco, Irish and tap, multi-purpose use, concerts and for operatic performances.

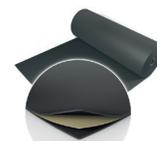

Harlequin Cascade is specified for loose-lay or permanent installation within dance institutions, dance studios, schools and theatres and is an excellent choice as the vinyl dance surface in conjunction with a Harlequin sprung floor.

Black
(CAS501)

Gray
(CAS582)

Dark Gray
(CAS406)

Hazelnut
(CAS470)

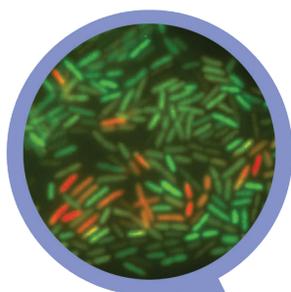

Beige
(CAS146)

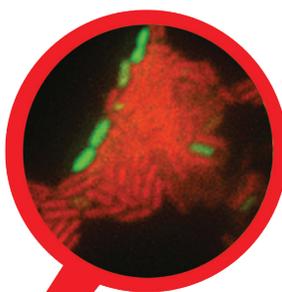

White
(CAS100)

Permanent or Portable	Both
Roll width	78.7" (2m)
Roll length	32'8", 49'2", 59', 65'7", 82', 98'5" (10m, 15m, 18m, 20m, 25m, 30m)
Colors	Black, Gray, Dark Gray, Hazelnut, Beige, White
Thickness	0.080" (2mm)
Weight	4.8lbs/yd ²
Fire rating	ASTM E648, E662 – Class 1

Unprotected surface
On an unprotected surface, the microbes begin to grow and multiply. Green staining indicates live microbes.

BioCote® protected surface
On a BioCote® protected surface, the microbes cannot survive. Red staining indicates that the microbes have been reduced.

Harlequin Cascade™

Now with BioCote® Antimicrobial Protection

The Harlequin Cascade™ you know and love is now manufactured with BioCote® for proven antimicrobial protection.

Why do I need antimicrobial protection?

BioCote® antimicrobial technology is manufactured into the new Harlequin Cascade, creating a performance surface that is protected from microbes such as bacteria and mold that can cause odors, staining, and material degradation. The result is a floor which is easier to keep hygienically clean by working constantly to reduce the presence of microbes on the floor surface.

How does it work?

BioCote® integral antimicrobial protection uses silver ion technology and is proven to offer protection for the expected lifetime of the product. Unlike some antimicrobial protection, it will not wear out or wash off. This technology reduces microbes on the floor by up to 86% in 15 minutes and up to 99.99% in 24 hours.

Makes your product more hygienic

Keeps your product fresher for longer

Extends the usable lifetime of your product

Easier to keep hygienically clean

Reduces potential for cross-contamination

BioCote® technology does not protect users or others against disease causing bacteria, germs, viruses, or other harmful organisms. This technology is not a substitute for good hygiene and/or cleaning practices.

How does the additive effect the Harlequin Cascade?

The BioCote® silver ion additive is inert and has no effect on the appearance or performance characteristics of the Harlequin Cascade. It is the same vinyl/marley floor you know and love.

More about BioCote®

With over 25 years' experience, BioCote® are experts in antimicrobial technology and the market leading antimicrobial additives provider. For more information, visit BioCote.com.

For the Ultimate Hygiene Solution, use with Harlequin Daily Cleaner + Disinfectant

Disinfectant/Cleaner/Deodorizer/All-In-One
