

Liberty LatchLoc Panels

Liberty LatchLoc Stage Panels

Harlequin's 'latch and lock' system

Harlequin Liberty LatchLoc™ is a modular, sprung floor panel system manufactured from layered birch plywood featuring dual density elastomer blocks on the underside to give uniform and consistent shock damping. The panels are laid in a brickwork fashion onto the subfloor, so that cross-joins do not coincide. The panels join together by a rounded tongue and groove, which is secured in place using our 'one turn of the key' latch and lock mechanism.

Harlequin Liberty LatchLoc panels are finished by choosing an appropriate Harlequin vinyl performance floor. Installation of the panels and the accompanying vinyl can be carried out by the customer or by the Harlequin Contracts Team. Solid kerbs and ramps are available for stage use or where the sprung floor does not extend to the walls of the studio.

Harlequin Liberty LatchLoc sprung floor panels are available as stage panels for touring. These panels have tempered hardboard attached to the underside for ease of sliding the panels into position to protect the elastomer blocks. The panels and accompanying portable Harlequin vinyl floor can also be stored on carts, providing an easy and safe way for stage crews to move them on tour and around a venue.

Specification Guide

Installation	Portable/Modular
Full Size Panel	96" x 48"
Half Size Panel	48" x 48"
Weight	86 lbs (Full Size) 43 lbs (Half Size)
Thickness	1 1/2" 1 5/8" (Stage)
Testing Standards	DIN 18032-2
Average Shock Absorption	67%
Vertical Deformation	4.1mm
Area Deflection	12.8%
Rolling Load	>1500 N
Maximum Point Load	2482 lbs

Harlequin Sprung Floor Application Guide

Along with Harlequin Liberty LatchLoc, we offer additional sprung flooring options, which are listed below along with the recommended surface. These recommendations are based on experience and customer preference only. Please contact a Flooring Specialist to determine which option best suits your requirements.
