

Harlequin TV Tiles are made in large 36" squares – the largest vinyl tile available in the world! The TV Tiles are engineered to precise standards to ensure 90 degree corners that allow the tiles to push together without gaps. They instantly lay flat and stay flat and are able to withstand the day-to-day demands of equipment, trolleys, lighting trusses and carpenters.

Harlequin TV Tiles have a satin finish with a neutral reflectance that minimizes intrusion to broadcast quality. The tiles are ideal for dance performances and are heavy duty. It is often helpful to bond some of the tiles with low-tack doubled-sided tape as this will provide a smooth studio base on which the camera crew can roll vibration-sensitive dollies with confidence.
