

Harlequin Tap Tiles are designed to provide the best tap surface, producing excellent crisp sound and minimizing the problems traditionally associated with tap, such as scuffing and pitting of floors. The Tap Tiles are supplied as square yard tiles that slide together to quickly form a tap area, protecting the floor beneath.

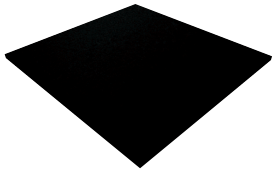

Harlequin Tap Tiles are manufactured to exceptional standards to ensure accuracy and flatness, requiring careful examination at every stage of the process. They are accurately cut in large format square tiles that fit together in precise alignment to form a tap area – large or small. When used on slippery sub-floors we recommend the use of double-sided tape at key places around the perimeter of the tap area. Tap Tiles are supplied with a protective coating to the satin finish that can simply be removed before initial use with a clean cloth dampened with a mild detergent.

Harlequin Tap Tiles are designed to provide the best tap surface, producing excellent crisp sound and minimizing the problems traditionally associated with tap, such as scuffing and pitting of floors.
