

Harlequin Ballet Barres & Brackets

Harlequin ballet barres complement any dance studio or rehearsal space. Ballet barres are an essential tool for warm-up and stretching exercises, allowing increased blood flow to the muscles, improving flexibility and lessening the risk of injury before taking to the dance floor. Harlequin offers various options of ballet barres to meet your studio and rehearsal space needs.

Harlequin Professional Series

- Maple or aluminum barre
- Height from floor to top of lower barre – 32.5" (82cm)
- Height from floor to upper barre – 41.5" (105cm)
- Barre diameter – 1 15/16" (5cm)
- Adjustable feet for stability on an uneven floor

- Integrated locking mechanism

4' Barre
• Length 52"
• Weight 12 lbs.

6' Barre
• Length 72"
• Weight 15 lbs.

Wall-Mounted Single Ballet Barre

Wall-Mounted Double Ballet Barre

Harlequin Wall Mounted Ballet Barres

Harlequin wall mounted ballet barres are available as single and double wall mounted brackets and barres.

- Brackets are supplied complete with screws and can be mounted at any height: four fixings for the single bracket and six fixings for the double bracket.
- Barres are set at 8¼" (21cm) from the wall to the center of the barre. On the double bracket the two wooden barres are spaced 8" (20cm) apart, center to center.
- Maple barre is 1¹⁵/₁₆" (5cm) in diameter and 60" (150cm) in length.
- Lengths of barre can be joined inside the bracket heads to hide the joins and give the impression of a continuous length of barre. For example, along the entire length of a studio wall.
- Choice of bracket color: black (standard), chrome plated (available as special order only; minimum quantity 25).
- Wall mounted barres should be anchored to wood studs or wall backing.

Suggested Barre Heights for Brackets:

- Single Barre: 32" - 46" from floor (waist level)
- Double Barre: 32" - 34" lower barre
44" - 46" from floor for upper barre

Floor-Mounted Single Ballet Barre

Floor-Mounted Double Ballet Barre

Harlequin Floor Mounted Ballet Barres

There are many occasions when it is not possible to fix ballet barre brackets onto a wall – perhaps in front of mirrors or where a wall is not suitable to accept fixings. The solution is Harlequin's floor-mounted ballet barres, designed to be permanently fitted at the same time as the installation of a Harlequin sprung floor. The vertical leg of the barre support is mounted onto the substrate and the sprung floor built around it. These barres can also be mounted onto an existing floor, provided it is not a sprung floor.

- Available in single and double barre models.

Installation

Harlequin wall-mounted and floor-mounted ballet barres can be permanently fitted at the same time as the installation of a Harlequin sprung floor through Harlequin's Contracts Division. We encourage customers to have all Harlequin products professionally installed by an experienced and licensed contractor. Product specifications are for clients' information and convenience only.
